Slant/Fin oil fired boilers converted to gas fired

Slant/Fin is frequently asked about the effect on our boiler warranty when one of our oil fired boilers is converted to gas fired. Slant/Fin does not sell or recommend any brand of power gas conversion burner. We have not performed any testing of these burners on our boilers.

Installation of an agency certified power gas conversion burner to a Slant/Fin oil fired boiler will not change the Slant/Fin boiler warranty. The burner must be properly installed in accordance with the burner manufacturer's instructions and conform to all local, state and national codes.

Slant/Fin will warranty the Slant/Fin boiler and Slant/Fin supplied material in accordance with our published boiler warranty. The Slant/Fin warranty starts when the boiler was originally installed. Slant/Fin does not warranty field supplied material, such as a gas conversion burner. The warranty for the gas conversion burner and burner performance is the burner manufacturer's warranty.
